JavaScript Enthusiastic | ReactJS, NodeJS, Redux| 1+ Years Exp.

CURRENT EXPERTISE

✓ **Skills –**

- o **JavaScript** – TypeScript, Web-Worker, RxJS and ES6+

- o **ReactJS –** with Redux and Context API. With both **ES6** and **TypeScript** variant

- o **NextJS –** with ReactJS, TypeScript, Redux, SSR.

- o **Redux –** with middleware: Epic (RxJS), Saga, Thunk

- o **Node JS** – Web API, Express, File System,

- o **Core Java**

- o **Tailwind CSS**

- o **HTML5, CSS3, Flex, Bootstrap –** Expert level

✓ **Database –** MySql, MongoDB.

✓ **Operating System** – Mac (Preferred), Windows.

WORKING EXPERIENCE

Total Experience: **1.6+ Years (Jan 2023 – Present)**

❖ Techxigo Software Solution (Mar 2024 – Current)

➢ **GS Trucking Web App**
Skills: **ReactJS, TypeScript, Context API, Tailwind CSS, Node JS, Mysql**
Role: Full stack Developer,

Overview: Designed and developed a full-stack logistics management system for GS Trucking to streamline operations involving drivers, trucks, and assigned delivery routes. The application features an intuitive React-based frontend and a secure, RESTful NodeJS backend with MySQL database integration.

Responsibilities:

- Built a responsive and user-friendly admin dashboard for real-time tracking and truck-driver assignment.

- Developed and integrated REST APIs to perform CRUD operations on drivers, trucks, and route data.

- Managed database schema and queries using MySQL for storing logistics-related data.

- Implemented secure communication between frontend and backend using Fetch and Express middleware.

- Improved logistics efficiency by enabling admins to monitor deliveries from source to destination.

➢ **E-Commerce Mega Store**
  Skills: **NextJS, React, Tailwind CSS, Redux Toolkit , Material UI.**
  Role: Front End Developer, Team size: 1

  Overview: Developed a scalable, high-performance frontend for a large commerce platform using NextJS and React, designed to handle thousands of products across multiple categories. The project amphasized responsive design, state management, SEO, and user experience.

  Responsibilities:

- Built reusable and responsive UI components for homepage, product listing, filters, cart, wish list, and checkout using Tailwind CSS.

- Integrated **Redux Toolkit** for global state management across cart, wish list, filters, and user authentication.

- Used **Next.js dynamic routing** and Image/Link components to enhance performance and UX.

- Enabled server-side rendering (SSR) for better SEO and fast initial page loads.

- Followed accessibility best practices and clean semantic HTML for a more inclusive user experience.

EDUCATIONAL QUALIFICATION

- ✓ 10th passed from CBSE Board in 2018 from Bihar
- ✓ 12th passed from CBSE Board in 2020 from Bihar
- ✓ BCA from IGNOU University in 2023

TECHNICAL CERTIFICATION

- ✓ Java Programming Certification – Ducat Institute - 8 months
- ✓ Computer Basic Fundamental – 6Months
- ✓ Desktop Publishing & Designing (DTP) – 6 Months
